GLOSSARY OF TERMS

1. Civilian Labor Force - the number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.
2. Employed - those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who, although not working had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.
3. Unemployment - the number of persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).
4. Unemployment Rate - the number of unemployed expressed as a percent of the civilian labor force.
5. Residence Data - a count of people by where people live.
6. Establishment Data - a count of jobs by where people work.
7. Seasonally Adjusted Labor Force Series - to facilitate the evaluation of the labor force, recurrent yearly movements have been isolated and removed by the Bureau of Labor Statistics X-11 variant of the Census Method II seasonal adjustment program.
8. Composite Index - an aggregate of six economic indicators. The indicators used are: Manufacturing - Employment, Average Weekly Hours, total Accessions and Layoffs; Average Weekly Initial Claims; and statewide Building Permits. A reverse trend was used for Layoffs and Average Weekly Initial Claims.
9. Real Spendable Average Weekly Earnings of Private Nonagricultural Production Workers - represents the earnings of a hypothetical individual after deductions for State Income, Federal Income and Social Security taxes, and adjustment for change in purchasing power since 1967. This individual is assumed to be sole support for a family of four, earn the average weekly gross earnings of production workers in Montana's private nonagricultural industries, and take standard deductions on State and Federal income taxes. Taxes were computed using standard tax tables, and purchasing power was adjusted by deflating Spendable Earnings based on the national Consumer Price Index.
10. CETA - Comprehensive Employment and Training Act of 1974.
11. SMSA - Standard Metropolitan Statistical Area as determined by Office of Management and Budget. Must have a central city with population of 50,000 or more.
12. IMA - Labor Market Area as determined by Research and Analysis, Department of Labor and Industry consists of a central city or cities with population of less than 50,000, and the economically integrated geographical area surrounding it.

All Labor Force Statistics contained in this publication are in accordance with the Federal guidelines as established by the Bureau of Labor Statistics. Methodology procedures use a household sample conducted in Montana on a monthly basis, called the Current Population Survey. These official statistics are used to allocate federal funding. Any questions concerning these figures should be directed to:

Labor Force	403.7	403.8	393.8	-.1	9.9
Employment	379.9	379.0	372.7	.9	7.2
Unemployment	23.8	24.8	21.1	-1.0	2.7
Unemployment Rate	5.9	6.1	5.4	-.2	.6

Economic Highlights and Employment Outlook

• Grain harvest is complete and projections estimate that wheat production for 1981 will set a record of 174.3 million bushels. The large crop production as well as lower demand and rising costs has caused the net farm income to drop. The Agriculture Secretary has announced that he intends to reduce wheat acreage next year by 15 percent in an effort to increase the prices that farmers receive for their crops. Dry bean and sugar beet harvest as well as winter wheat planting has begun.

• The oil and gas lease sale held early in September showed renewed interest in western Montana. The \$9.8 million in bids was the second highest ever received by the state. More than 81,000 acres of Valley County and 67,203 acres of Flathead County were the largest county totals of the 287,540 acres that were bid on.

• Several construction projects around the state are to be financed by the \$36.6 million bond sale this month. Developments in the financial market in late August caused a delay in the sale. When the market improved in September, immediate sale of the bonds was authorized. Some of the 15 construction projects financed by the bonds may get started this fall and improve the outlook in the construction industry.

• A large wood products corporation announced layoffs of a total of 200 employees at three of its sawmills the end of August. Other mills are making production cutbacks to reduce inventories. Employment in the lumber and wood products industry is about 2,000 less than it was in 1979 and mills around the state are continuing to feel the effects of the slump in home construction.

• The summer tourist season was substantially better than last year and provided an increase of business for the retail trade and motel industries. Glacier Park, which is beginning to close its facilities, had a near record of 1.5 million visitors. Yellowstone Park counts indicate about 20 percent more people entered through the gates in Montana than in 1980.

GREAT FALLS SMSA

- The grain harvest in the area is complete and the yield has been very good. Demand for agriculture laborers has decreased some from last month, but the Job Service is still receiving openings for permanent farm hands.

- August building permits increased in number and in value over the previous month, but the total of 42 permits issued is considerably less than the 70 issued in August of last year. Some improvement in residential building was noted as six permits were issued for single-family units last month compared with only one in July. Two new businesses valued at \$241,250 will be constructed. The largest share of the total \$1.7 million in building permits issued in August was for alterations and repairs. The state's bond sale which apparently will be made this month, will provide for the construction of a \$2 million project at the School for the Deaf and Blind.

- Employment in construction continues to decline. The current employment survey estimates a drop of over 100 employees from July to August in contract construction and this estimate is 200 less than August of 1980 and 500 less than August of 1979. Many of the tradesmen are commuting to work sites that are over 300 miles away in eastern Montana.

- A tractor manufacturing firm finished its first tractors this month and is demonstrating them in Montana and Canada. The firm currently produces two tractors a month at its plant northeast of Great Falls and will increase production as sales of the \$125,000 units increase.

BILLINGS SMSA

- An oil exploration company is planning to set up a regional office in Billings sometime next year. The company now has 25 persons working in Billings. They plan to have total employment of 200 when the move is completed. Most of the new employees will be transferred in.

- The material warehouse for a furniture factory in Bridger burned to the ground and left 21 persons without work. Another building owned by the company is expected to be used soon to get the business rolling again.

- Nearly 300 meat cutters were reported involved in a labor dispute on August 25, 1981 after they rejected a contract offered by their employer.

- A charitable organization is a new business on Grand Avenue in Billings. It will employ about 15 persons. Also new is a retail coin shop and a school of cosmetology. These will employ one and two persons respectively.

- Construction in the Billings area consists of a \$1.3 million contract awarded to a Billings contractor for a project on Highway 1-90 between Big Timber and Grey Cliff. Another Billings company was low bidder on a \$252,119 project on the Custer Battlefield Interchange. Also, a 100 unit motel is under construction in the Billings area by a Missoula contractor.

ANACONDA - BUTTE LMA

- Overall, the construction industry continues its slump. In Butte, building permits for August were at an all-time low. High interest rates have been delaying the sale of state construction bonds, but they have finally been sold. Included is a \$3.8 million development of the new Vocational-Technical Center in Butte. Construction of a 36,000 square foot building in Anaconda's industrial park continues on schedule for a plastic manufacturing firm. Also in the industrial park, a 10,000 square foot building is being considered by a cabinet company.

- The Economic Development Administration has announced a \$100,000 grant for Butte-Silver Bow. Also, the grant will be supplemented by \$25,000 from the state to set up a revolving loan fund to attract new businesses or expand existing enterprises.

- Fall semester enrollment at Montana Tech set a new record with just over two thousand students. The 1981 figure represents an increase of 16.6 percent over last fall and the past eight years enrollment calculates to an average annual increase of 13.2 percent. Tech administrators are not displeased with the influx of students, but fast growth rates do put a strain on classroom space and the filling of teaching positions.

- The Anaconda Copper Company is reviewing the Weed Concentrator development with a \$500,000 feasibility study. If the study is positive, capital cost would be a primary consideration before expansion could begin, along with the status of the copper market.

- Drilling has started on the first oil well in Powell County. The drilling company plans to hire 27 area residents and expects to spend between \$3 to \$5 million digging the well. The well will be a "tight hole", meaning the company will give out little information on the progress of drilling.

BOZEMAN LMA

- Agriculture field work continued into September. Crop production has been above average this year. As most of the harvest was being completed during the month, there was limited employment opportunities for farm workers and many seasonal hands were laid off.

- Seasonal layoffs are beginning in the construction industry as major projects are being completed and new projects are not being started. The number of building permits issued for Bozeman in August was 23--ten less than August of 1980. Total value of the permits was \$2.1 million and nearly equal to last year's value. Over half the total value was one project of \$1.4 million for building new offices. New single family residential construction remained the same as six permits for new dwellings were issued during the month. A decline in construction has affected lumber sales. These unstable conditions are causing Livingston lumber yards to project employment at current levels for only a week or two in advance.

- Manufacturing employment remained low. A lumber mill in Livingston had not recalled their laid off employees as of mid-September. A mobile home plant in Gallatin County went to a three day work week again.

BOZEMAN LMA (CONT.)

- Tourism has been good this summer. Yellowstone Park's North and West entrances have had more than a 15 percent increase in traffic. The increase in travelers has caused a need for service workers in the hotel, motel and restaurant industries. This demand continues due to a need to fill jobs vacated by students returning to school even though the number of vacationing families is tapering off. In Bozeman, the opening of the University will continue to cause a demand for service workers.

GLASGOW LMA

- Highlighting the area economy this period is a proposal by the federal government to establish a refugee resettlement center at an industrial park north of Glasgow. The project would generate 200 to 300 local jobs; and if approved, refugees could be arriving within 45 days, with full operations expected in six months.

- The number of workers actively working on a pipeline project begun this spring is steadily diminishing. Less than two months of actual construction is yet to be done and all operations should wrap up two to three months after the pipe is in the ground.

- Construction activity was stable, and there was a slight increase in residential construction. There were openings in agriculture for workers to help with harvesting and haying, however, no shortages were reported. There were no openings reported for workers in oil exploration or drilling. Numerous openings were reported for workers in retail trade, food service, and motel--due in part to students returning to school.

GLENDIVE LMA

- Construction activity highlights the area economy this period with several new homes underway and numerous major commercial projects coming along as expected. A new shopping center in Glendive is progressing on schedule and should open near the end of November. Leases have been signed with a major discount retailer, two clothiers, a hardware store, a billiard parlor, and a fast food franchise. Other possible tenants are negotiating leases at this time. Also in Glendive, a new motel will open soon, and in Sidney, numerous projects have started: city shop facilities, a school bus garage, and an office building. Several new retail businesses have opened throughout the LMA.

- Agriculture activity was stable and any job openings were quickly filled by local people. The winter wheat harvest is nearly complete, with yields good but content varying significantly. The second cutting of alfalfa is almost done and the sugar beet harvest should begin October 1.

- In oilfield exploration, openings were reported for seismic helpers due to college students returning to school. Local officials report an oversupply of workers seeking jobs in the oilfields.

HARDIN-RED LODGE LMA

- Agriculture field work continues in the area as beans and beets remain to be harvested.

- Platinum and palladium mining in Stillwater County came closer to being realized as a mining company presented a plan of operation for a mine and mill in the Nye area. The proposal is for an underground operation that will produce 1,200 tons of ore a day, have an average employment of 200 people and a life of 10 to 20 years. A mill will be built to crush the ore, but smelting of the ore is not proposed for the area. The 60 employees who currently do exploratory operations for the minerals ended their field season in mid-September. They have been housed in Stillwater County, but will work out of Big Timber when they start again in the spring.

- Oil has been found near Red Lodge. A wildcat rig made the significant find while drilling near the 9,000 foot level.

- A furniture manufacturing plant in Bridger, which was destroyed by fire the end of August will resume production at a temporary location as soon as supplies are replaced.

- High interest rates are delaying the construction of a \$4 million fuel alcohol plant planned for Carbon County. Residential building and land transfers, however, do not seem to be significantly affected.

- Tourists have been using the Red Lodge-Cook City entrance to Yellowstone Park in increasing numbers this year. The Northeast entrance has had 42.3 percent more traffic so far in 1981 than it did over the same period last year.

HAVRE LMA

- New businesses in the Havre area include an auto repair and welding shop and a machine and welding service. A drug store has been added to a local grocery store in Havre, and a self serve gas station is reopening and will carry quick food along with the oil and gas.

- New car sales in the Havre labor market area dropped from 60 in July to 28 in August. This brings the year-to-date total to 424 compared to 484 in 1980.

- With harvest completed, agriculture activity consists mostly of summer fallowing and rock picking.

HELENA LMA

- Most agriculture crops have been harvested. Yields have been good to excellent, but prices received for the products are low. There is very little demand for farm laborers at this time even though some hay is still being cut and potatoes have not been harvested yet.

HELENA LMA (CONT.)

- A mining company has been granted a permit to continue operating their silver mine in Jefferson County. The firm has complied with water regulations since being fined earlier for polluting a mountain stream. Two large energy conglomerates are exploring for hard rock minerals on over 5,000 acres of unpatented mining claims in Lewis and Clark County. A wildcat rig will sink a deep hole in search of oil from Hogback Mountain near Helena.

- Over \$15 million in construction projects are to be financed from \$36.6 million of bonds that the state hopes to sell this month. Renovation of the State Capitol and new buildings for the Department of Natural Resources and Conservation and the Workers' Compensation Division are the major projects in Helena to be funded from the bond sale.

- Lumber mills in the area are laying off people due to the poor lumber market. Sixty-five to seventy people at the mill in Townsend were let go the end of August. The night crew at a mill near Helena was laid off in mid-September.

- A new department store will open soon in Helena. Interviews were held at the Job Service for the fifteen people they hope to hire. Another large department store closed its doors and laid off the last of their sales people this month.

- Most of the employment opportunities occurred due to turnover caused by summer employees leaving to return to school. There was good demand for service workers in the restaurant and motel industries and a continuing need for qualified clerical help.

KALISPELL LMA

- The lumber and woods industry highlights economic activity in the Kalispell area. A large lumber company announced layoffs of 250 persons in its Montana mills. About 100 persons will be affected in Columbia Falls and 85 persons in Trout Creek. These and other industries are affected by the continued high interest rates which have slowed housing construction and reduced demand for dimensional lumber.

- A lumber mill in Libby cancelled eight contracts with loggers. The lumber contracts were cancelled for an indefinite period of time because the present inventory exceeds the demand of log use in the mill.

- A cut in production at a Libby paper mill will effect 60 persons starting in September. Mining near Troy is expected to be reaching full production. Some jobs should be opening in different industries as students return to school.

- Work has begun on a one and one-quarter million dollar street, sewer and water project in Polson. Other than this, there is no other major construction reported.

KALISPELL LMA (CONT.)

- The state netted more than \$9.8 million with two oil companies bidding more than \$5 million of the total. It was announced that this was the second most profitable oil and gas lease sale on record. More than 67,000 acres were leased in Flathead County. The average bid on Flathead tracts was \$24.93 and the state average was \$34.17 per tract.

LEWISTOWN LMA

- Activity at motels and restaurants continued at a brisk pace due to a steady flow of tourists in the area. There was steady demand for sales clerks, food service workers, and motel workers, but no shortages of available workers have been reported.
- There was occasional demand for agriculture workers to help with harvesting and haying operations. Construction activity was quite slow with no new projects announced. Two school remodeling projects did get started and most residential building activity involves remodeling instead of new construction.
- Throughout the period, claims for unemployment insurance did not rise. Outside activities in agriculture and construction increased enough to keep employees on the payrolls.

MILES CITY LMA

- Economic development news in this reporting area is more of future considerations in coal mining. The Tongue River area is currently in dispute as to the damage that could occur to agriculture production from future coal mining. The results of a study indicate the land could be reclaimed if mined for coal, but the same research project indicates massive exploration of the region's coal beds could cause water pollution problems. State and federal officials have until December 22 to decide if they will declare all or part of the Tongue River drainage south of Miles City unsuitable for coal mine development.
- An official of the U. S. Interior Department has suggested that 800 to 1.2 million tons of federal coal from the fort union formation be leased in 1983. This is substantially more than a regional coal team recommended. The fort union coal field includes eastern Montana, the Dakotas and southern Alberta. The lignite coal from the formation will have to be burned at generating plants or used in synthetic fuel plants. Also, the lignite is not expected to be shipped from the area because it has low energy potential when compared with other types of coal and because it has a tendency toward spontaneous combustion when transported long distances. Currently, about 300,000 tons of lignite coal are mined annually in Montana.

MISSOULA LMA

- A soft market for lumber products continues to affect most lumber mills' production and employment. A pulp paper mill in Frenchtown will close for at least two weeks. The mill employs about 700 workers and will stop production on September 23.
- The increased oil and gas exploration activity of the overthrust belt has prompted a California helicopter firm to relocate near Hamilton. The company overhauls helicopters and supplies component parts to helicopter owners. In addition, the company has a fleet of nine helicopters.
- As can be expected, the August building permits for Missoula city-county area shows little activity. Not only is new home construction suppressed, but realtors noted house sales by dollar value indicate a 16 percent decline from last year for the first eight months.
- In Missoula County, new car registration indicates a reasonable number of car purchases occurring during the first eight months of 1981, up 1 percent over last year and 11 percent less than two years prior. Statewide new car registrations for 1981 are 7 percent ahead of last year's pace.

SHELBY - CUT BANK LMA

- Geraldine has a new fertilizer plant which will produce 300-400 tons of liquid fertilizer per day. The fertilizer is said to cost 30% less than conventional liquids.
- A natural gas field in the Blackleaf Canyon 20 miles west of Chouteau is planned by next summer. A sweetening plant to remove hydrogen sulfide is also planned on the Blackleaf Game Range. The Montana Fish and Game Commission will have to approve easements for the pipeline.
- Harvest is nearly completed with bumper crops reported for nearly all areas of Glacier County.
- Construction activity in the labor market area consists only of ongoing projects. No new construction is reported at this time.

CHARACTERISTICS OF THE INSURED UNEMPLOYED

<u>Social Characteristics</u>	<u>Percent of Total Insured Unemployment</u>

1/ The Consumer Price Index (CPI) measures changes in prices of goods and services in major expenditure groups. The CPI for Urban Wage Earners and Clerical Workers (CPI-W) covers about 40 percent of the total noninstitutional population. The CPI for All Urban Consumers (CPI-U) covers about 80 percent of the total noninstitutional population, including wage earners and clerical workers, salaried workers, the self-employed, retirees, and the unemployed.

MONTANA'S COMPOSITE INDEX

Montana's Composite Index rose slightly in July after a considerable decline in June. While three components registered negative movement, manufacturing average weekly hours and building permits recorded significant positive movement. Average weekly initial claims also recorded a slight positive movement. On the negative side, the manufacturing layoff rate registered the most significant change when it rose from 0.8 in June to 2.0 in July.

Components of Composite Index:

Employment, Average Weekly Hours, Total Accessions, and Layoffs in Manufacturing; Building Permits; and Average Weekly Initial Unemployment Insurance Claims.

Real Spendable Earnings

With the new State of Montana tax tables, average weekly earnings registered little change from a month ago. Compared to July, 1980, average weekly earnings dropped by \$3.60.

If the tax tables had not changed, real spendable average weekly earnings would have fallen to \$76.89. This would have been the lowest number recorded since the series was originated in 1975.

Real spendable average weekly earnings of \$77.48 for July were 17 cents lower than the June amount of \$77.65.

- 1/ Average Weekly earnings of total private nonagricultural production workers.
- 2/ Real spendable average weekly earnings of private nonagricultural production workers.
- 3/ Taxes computed on family with four exemptions.

UNEMPLOYMENT INSURANCE: CLAIM TO PAYMENT

Many of those persons who become separated from their jobs, enter our local Job Service offices for two reasons: to seek employment and to claim unemployment insurance (UI) benefits. Claimant wage credits obtained from insured employers are examined to determine if the claim meets monetary eligibility requirements for UI benefits and, if so, for how much per week is the claimant qualified. Monetarily eligible claims are subsequently segregated according to criteria for establishing which party (claimant or employer) was most responsible for the job separation in question. Claims for job separations resulting from claimant actions (issues) are further subjected to the test of whether or not an individuals' reduction in his potential benefit duration is warranted. If otherwise eligible and if availability criteria continue to be complied with throughout his actual unemployment duration, weekly benefit payments will commence with the claimant's second week of unemployment (a waiting week must be served under Montana law). The number and amount of such payments by county are shown in the table on the following page. Interstate payments in the table refer to payments made to individuals who now reside in other states but who had established wage credits in Montana based employment. Amounts shown in the table are financed through employer taxes paid to the Montana UI Trust Fund Account.
